DETAILED ACTION

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Trivette, Jr. (Trivette), Dn 122; 13570, Dn 120; 10211 (US 5342900).

DN 122; 135730, DN 120:10211 and Trivette discloses vulcanizing system similar to one in claimed composition (see column 4, lines 54, 55, 62; column 7, lines 65-67; column 8, line 2; column 24, line 55; column 25, lines 23, 24; column 40-, lines 58-65 of Trivette).

Although Trivette discloses a large list of compounds, the claimed vulcanizing system is suggest^{ed}_A including the compound I and appropriate range of sulfur.

The reference DN 122 and DN 120 use a weight of sulfur which is proximate to values disclosed by applicants thus it would be obvious to a skilled person in this art^{to}_A modify the sulfur amount in small increments because only slight variations in processing safety or in some instances, no^t_A variations in processing safety would take place.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CAR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CAR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1713

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
